## CAREER PROFILE

**NAME**  
**Anja Gilje**

**EMPLOYER**  
**ZU**

**EDUCATION**  
**B.Sc. Computer Science**

### Details of the job

Anja's has just graduated with her B.Sc. Computer Science. She was hired immediately after she graduated. She was active in her educational career. She was sure to participate in school events that related to her field. She also took part in the internship program that was offered to Computer Science students. Her experience in School as well as her practical experience gave her the very best hands-on tools she needed to get a position right out of university. This pathway was the best to take in order to guarantee her a leg up above other grads that had come from her college.

### A typical day

Anja starts her day off meeting with her team for a daily standup. This allows her to plan for the day. It also allows team members to ask for help or mention roadblocks that may have come up. Throughout the day she will spend her day creating code for interesting clients. She may even help others on her team break through issues they may be having. She is able to concentrate on her own or pair code with other incredibly smart players on her team!

### Skills required

- You have to be an amazing team member which includes listening and communication skills.
- You have to have the will to break through problems on your own but know when to ask for help.
- You need the technical skill that is provided by accredited colleges.

### General comments

Anja has a thirst to continuously learn throughout your career. She is on her feet all the time so she can be the nest for her team and the company. After all, she is a scientist.

### Where can I go to get an education?

- Anja went into Computer Science and the University of Saskatchewan

### Helpful highschool courses

- English 20/30
- Math 20/30
- Computer Science 20/30
